

Bunch Consulting

Finance App

Project estimate

Oct. 11, 2021

Content:

1. [Development Preliminary Estimate](#) Estimated efforts of every team member based on a list of features
2. [Development Timeline](#) Preliminary timeline of the project based on platform and specific services to deliver
3. [Budget Burndown Chart](#) Estimated budget burndown, represented on an iteration basis
4. [Technology Stack](#) A brief description of the proposed tech stack
5. [Testing Strategy](#) Constraints and assumptions for the definition of done and acceptance criteria
6. [Risks and Assumptions Matrix](#) Description and mitigation plan of risks and assumptions that have an impact on the project timeline and budget

Project 'Finance App example': preliminary development estimate by Bunch Consulting

Estimate by Services:	Hours	Rate (\$ per hour)	Cost (\$)
Business Analysis	60	30	1,800
UX&UI Design	112	35	3,920
Flutter (mobile cross-platform) Development	520	30	15,600
Back-End Development	798	35	27,930
Fron-End (Web) Development	470	30	14,100
Quality Assurance	348	25	8,700
Project Management	276	30	8,280
Total:	2 584		80,330

Estimated Sprints	
Mobile Development Sprints	7
Backend Development Sprints	11
Frontend (web) Development Sprints	6
Total Sprints:	11
Development timeline: 75 hrs/sprint (per developer)	

Team Composition	Business Analyst	UX&UI Design	Flutter (mobile)	Backend	Frontend (web)	QA	Project Manager	The estimated cost of the feature (\$)
Quantity of team members	1	1	1	1	1	1	1	
Hourly rate (\$)	30	35	30	35	30	25	30	

Epic (Stage)	User Story (Task Feature)	Business Analyst	UX&UI Design	Flutter (mobile)	Backend	Frontend (web)	QA	Project Manager	Cost (\$)
		Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	
Planning Stage	Requirements elicitation	8						2	300
	Requirements analysis	14						3	510
	Creating diagrams	8						2	300
	Creating documentation and functional specifications	18						4	660
	Requirements validation with client and team	12						3	450
	Create DB architecture				12			3	510
	Create API architecture				8			2	340
	UX Research, Information Architecture, User flow		8					1	310
	UI Research, Design concept, UI Kit		8					1	310
	Preparing wireframes		40					4	1520
	Review designs			4		4	2	2	350
	Review requirements		4	4	4	4	2	4	690
Common and tech tasks	Assets delivery, developers support		8					1	310
	App Icons Design		4					1	170
	UI design of mobile app: main screens and user flows		24					3	930
	UI design of web app: main screens and user flows		16					2	620
	Project Setup			4	8	8		2	700
	Project Architecture			8	12	12		4	1140
	Database setup			8	12			2	720
	CI/CD setup			8				1	270

Epic (Stage)	User Story (Task Feature)	Business Analyst	UX&UI Design	Flutter (mobile)	Backend	Frontend (web)	QA	Project Manager	Cost (\$)
		Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	
Common and tech tasks	Create launch screen			2			0.5	0.5	87.5
	Setup default progress component (Alert, Spinner, etc)			1			0.5	0.5	57.5
	Create and maintain the API documentation				18			2	690
	Setup network layer			3			1	1	145
	Setup socket connection (authorize in sockets api request. setup base socket framework)			6	6	6	4	3	760
	Handle base errors			2	2	2	2	1	270
	Server deployment				8		2	1	360
	Admin Panel development				24			3	930
	Multilingual support			2	16	2		2	740
	Setup a custom keyboard (both for iOS and Android)			32			7	4	1255
Features development									
On-boarding	User onboarding flow			16	2	18	8	5	1440
Authorization/Registration	Splash Screen			4			1	1	175
	Start screen with an option to choose Log In or Sign Up			6	2	6	3	2	565
	Registration flow			8	8	32	10	6	1910
	Facebook integration (signup and login with FB credentials)			12	16	8	8	5	1510
	Email integration (signup and login with Google account credentials)			10	12	8	6	4	1230

Epic (Stage)	User Story (Task Feature)	Business Analyst	UX&UI Design	Flutter (mobile)	Backend	Frontend (web)	QA	Project Manager	Cost (\$)
		Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	
Authorization/Registration	Login			8	4	6	4	3	750
	Profile			8	6	6	4	3	820
	Sign out			2	2	2	2	1	270
User Profile	Profile page			6	8	5	4	3	800
	Prefill data and confirm/edit options			8	12	6	6	4	1110
	Set up and unlock options (PIN, TouchID, FaceID to unlock the app)			18			4	3	730
	Reset password (validation via email)			2	8	2	3	2	535
	Receive an in-app bank card: view, add, remove			8	24	10	9	6	1785
	Link other banks accounts and cards: view, add, remove			6	32	8	10	6	1970
	List of cards and accounts			4	4	4	3	2	515
	Help and FAQ page			4	6	5	3	2	615
	Automatically recognize data from scanned documents (integration with MITEK service)			16	38		11	7	2295
Loans	Loan request flow			16	24	20	12	8	2460
	Verification flow			6	16	6	6	4	1190
	Terms and conditions			2	3	2	2	1	305
	Eligible amounts			6	8	6	4	3	830
	Breakdown with details			8	6	10	5	3	965
	Settings: repayment account, payment schedule			6	12	6	5	3	995

Project Finance App example': project budget burndown chart by Bunch Consulting

Project Budget Burndown Chart

# of sprint	Stage	Payments Plan	Budget Baseline	Scope Change
		\$6,000	\$80,330	
1	1: Planning Stage		\$74,330	
2	2: Development	\$3,375	\$70,955	
3	3: Development	\$5,560	\$65,395	
4	4: Development	\$4,860	\$60,535	
5	5: Development	\$4,060	\$56,475	
6	6: Development	\$5,050	\$51,425	
7	7: Development	\$6,380	\$45,045	
8	8: Development	\$9,260	\$35,785	
9	9: Development	\$9,260	\$26,525	
10	10: Development	\$9,260	\$17,265	
11	11: Development	\$9,760	\$7,505	
12	12: Product Release	\$7,505	\$0	

Key financial terms and conditions

- Payments on a bi-weekly basis
- Prepayment to cover the first two weeks of the team's work (USD 6,000)
- Cover an invoice based on a bi-weekly report (to cover actual team members efforts)
- The last two weeks will be covered by the prepayment + extra efforts

Project Finance App example': testing strategy by Bunch Consulting

Technology stack	Mobile	Backend	Frontend
Platform related technologies	Flutter	Python	Angular.js
	MVVM	Django	JS
	RxKotlin	PostgreSQL	HTML
	ObjectMapper	REST API	CSS
	SOLID	AWS	
	REST		
	Realm		

Design Tech Stack	
Visual / UI Design tools	Sketch
Assets / Specification Sharing	Figma
Quick Prototyping	Figma
Interactive Prototyping	Principle
Motion design tools	Adobe After Effects
Web Publication	Readymag

Project Finance App example': suggested technology stack by Bunch Consulting

Frontend (web) supported browsers

The following list of browsers / OS is identified as "supported browser / OS". While the application will work on other mobile devices, the acceptance testing should be conducted only on the browsers / OS from this list:

OS:

Win 10
Mac OS Big Sur

Browsers:

Google Chrome Version 85.0.4183.121 (Official Build) (64-bit)
Safari 14
Edge

For all browsers, only the latest version available up to date will be supported. Any browsers and OS versions released after the date of this estimate are considered out of scope

Mobile app layout and constraints

Layout

The application will support the following screen orientations: portrait, landscape

Mobile Operation Systems and Devices

The following list of devices / OS is identified as "supported devices / OS". While the application will work on other mobile devices, the acceptance testing should be conducted only on the devices from this list:

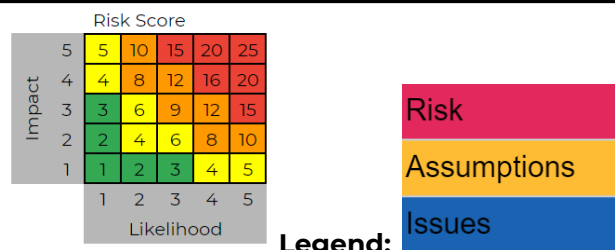

Android

Android R and more recent
Google Pixel 5
Xiaomi Redmi 5A
Big screens emulator

iOS

iOS 14 and more recent
iPhone 11 and more recent
Any devices and OS versions released after the date of this estimate are considered out of scope

Project Finance App example': preliminary risk and assumptions matrix by Bunch Consulting

Risk #	Risk Title	Risk Description	Likelihood	Impact	Risk score	Mitigation Action To Taken	Assigned To
1	Cross-platform development could be not suitable for future requirements	At the current stage, we assume to use Flutter, but it may happen that some future features cannot be delivered with any cross-platform framework. For example, features that require to use of smartphone hardware such as a camera.	3	5	15	During the development stage requirements for every feature to develop in the future should be reviewed by the tech team before include in the project plan.	Client + BA + Team + PM
2	Stakeholders may change priorities	Features priorities may change which can lead to an additional time of team members spent on clarifying details.	3	3	9	In order to successfully complete the planning stage, the goals and priorities for the Planning Stage for First Release should be clearly defined and followed by all project stakeholders, including the client. All additional requirements can be discussed and documented only on high-level, whereas most high-priority scope will be elicited and documented in detail (roll wave planning).	Client + PM + RA
3	Customized charts appearance according to design with using third party graphic libraries	Estimated efforts numbers are based on using third-party libraries.	3	3	9	In a case of necessity to implement custom graphics required efforts and amount of work should be precisely estimated and confirmed with the client before adding to the project plan.	Client + RA + Team + PM
